Schulich School of Engineering, University of Calgary

Experience

University Projects

Web Application of a Flight Reservation System

- Practiced a complete process of design and development of a software project in a team environment.
- Demonstrated understanding of design communication with creating and using UML Diagrams
- Proficiency in object-oriented principles were applied throughout the design process.

Building the frontend of a commerce website

- Created a dynamic commerce website interface using React and CSS, optimizing user experience with reusable components and responsive and user-friendly design.
- Collaborated with backend teams to seamlessly integrate frontend components with a microservices architecture, ensuring efficient data communication via RESTful APIs.
- Exercised front-end testing and incorporated feedback to optimize user experience.

Volunteer Experience

Library Volunteer - Bowness Public Library, Calgary, Alberta (January-March 2020)

- Conducted math-related activities for children aged 6-12.
- Facilitated group discussions and activities that promoted teamwork and problem-solving skills among participating children, creating a supportive and inclusive atmosphere.
- Contributed to the library's mission of promoting literacy and educational enrichment, leaving a positive impact on the community.
